

Rajesh K

Software Engineer · Full Stack Developer · Java & Python Backend

+91 8217354109 | Rajeshksoftware@gmail.com | www.rajeshk.online | github.com/Rajesh3655 | Bengaluru, India

SUMMARY

Motivated fresher and aspiring Software Engineer with strong foundations in Java and Python backend development, REST API design, and full-stack web delivery. Passionate about building scalable systems — from architecture through cloud deployment — including authentication, database design, and responsive frontends. Actively developing real-world skills through self-initiated projects and coursework.

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, SQL
Backend	Flask, REST APIs, JWT Authentication, MVC Architecture, System Design
Frontend	HTML5, CSS3, JavaScript, Responsive UI
Databases	MongoDB, MySQL
Cloud	Render, Netlify, Hostinger, AWS SES, Cloudflare
Tools	Git, GitHub, Postman, VS Code
Concepts	OOP, Multithreading, DSA, SDLC, Agile, CI/CD

PROJECTS

INFIBOLT — E-Commerce Platform <https://www.infibolt.com/>

React 18 · TypeScript · Node.js · Express.js · MongoDB · JWT · Tailwind CSS · PM2 · Hostinger

- Engineered a scalable production e-commerce platform using a monorepo architecture — React 18, TypeScript, and Tailwind CSS on the frontend; Node.js, Express.js 5, and MongoDB Atlas on the backend.
- Built secure REST APIs with JWT auth, Google OAuth, bcrypt, input validation, and OTP/email workflows via ZeptoMail; integrated Stripe payments, Google Maps, and Sentry for production observability.
- Implemented frontend state management with Zustand and TanStack Query; deployed via PM2 on Hostinger with npm workspaces monorepo for scalable codebase organisation.

AI-Based Civic Issue Reporting System <https://civicpulse-sb38.onrender.com/>

Python · Flask · MongoDB · AI Classification · REST APIs

- Engineered a geo-tagged complaint platform across 3 user roles (citizen, admin, authority) with 6+ REST endpoints and an AI classification pipeline — Smart India Hackathon submission.
- Automated issue categorisation reduced admin triaging overhead by 40%; built for city-scale deployment with modular, horizontally scalable architecture.

FindNearPG — Location-Based Search Platform <https://findnearpg-web.onrender.com/>

Python · Flask · MongoDB Atlas · Google Maps API · JavaScript

- Developed a geospatial PG-finder integrating Google Maps API with MongoDB Atlas geo-indexed queries — returns results within a 5 km radius in under 2 seconds.
- Implemented secure user authentication and contact workflows; 500+ users post-launch with ~35% reduction in mobile bounce rate after responsive UI optimisation.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026

Presidency University, Bengaluru · CGPA 9.0 / 10

Bachelor of Computer Applications (BCA) 2021 – 2024

Vidyavahini First Grade College, Tumkur · CGPA 9.21 / 10

CERTIFICATIONS

Full-Stack Java & Software Testing · QSpiders, Bengaluru (2024)

Core Java · Selenium WebDriver · SQL · JUnit · Automation Testing Frameworks
