Professional Summary

Java Developer with strong knowledge of Core Java, Object-Oriented Programming, and database integration using SQL. Experienced in developing backend applications and RESTful services with a focus on clean code and scalable architecture. Skilled in automation testing using Selenium WebDriver with Java and experienced in manual testing methodologies. Passionate about building reliable Java-based applications and continuously improving software quality.

Technical Skills

Programming Languages: Java, Python

Core Java Concepts: Object-Oriented Programming (OOP), Exception Handling, Multithreading, File Handling

Web Technologies: HTML5, CSS3, JavaScript

Database Management: MongoDB Atlas, SQL, MySQL

Testing & QA: Selenium WebDriver, Manual Testing, Automation Testing, Test Case Design

Tools & Platforms: GitHub, Postman, Render, Netlify, Hostinger, Cloudflare Pages

Other Skills: Data Structures, Algorithms, Responsive Design, Agile Methodology

Projects

- ☛ **AI-Based Civic Issue Reporting System – Smart India Hackathon (SIH) Project** | *Python, Flask, MongoDB, Web Technologies*
 - Developed a civic issue reporting platform enabling citizens to report problems such as potholes, garbage, and water leaks with location and image support.
 - Built backend APIs using Flask for complaint management, status tracking, and efficient issue resolution by authorities.
- ☛ **Voting Management System - Secure Online Voting Platform** | *Python, Flask, MongoDB*
 - Built secure voting platform with Flask backend, MongoDB database, user authentication, and single-vote validation ensuring election integrity
 - Created admin panel with candidate registration, voter management, and live results dashboard with real-time updates
 - Successfully handled 100+ concurrent users during mock elections with zero data breaches; deployed on Render with 99.9% availability Live Link: <https://voting-management-system-rqem.onrender.com/>
- ☛ **FindNearPG - Location-Based PG Finder Web Application** | *Python, Flask, MongoDB Atlas, Google Maps API*
 - Developed web application with Flask backend and MongoDB Atlas for scalable cloud data storage, integrated Google Maps API for location-based search
 - Designed responsive frontend with HTML5, CSS3, and JavaScript featuring intuitive UI and real-time data updates
 - Implemented secure user authentication and contact functionality enabling users to find PG accommodations within seconds
 - Live Demo: <https://findnearpg-web.onrender.com/>
- ☛ **Worked on freelance projects developing responsive web applications and backend services and deployment service for clients.**

Education

Presidency University 2024 – 2026

Master of Computer Application (MCA) - CGPA: 9.0/10

Bengaluru, Karnataka

Vidyavahini First Grade College 2021 – 2024

Bachelor of Computer Application (BCA) - CGPA: 9.21/10

Tumkur, Karnataka

Certifications

QSPIDERS Internship Certificate: Full stack java & Software Testing (Selenium, Java, SQL)
